Model ESFR-25
25.2 K-factor Pendent Sprinkler
Early Suppression, Fast Response

General Description

TYCO Model ESFR-25 Pendent Sprinklers are Early Suppression, Fast Response (ESFR) sprinklers having a nominal K-factor of 25.2 (Ref. Figure 1). They are suppression-mode sprinklers that are especially advantageous as a means of eliminating the use of in-rack sprinklers when protecting high-piled storage.

The Model ESFR-25 Sprinklers are primarily used for ceiling-only sprinkler protection of, but not limited to, the following storage applications:

- most encapsulated or non-encapsulated common materials including cartoned, expanded plastics
- uncartoned (expanded) plastics in accordance with NFPA 13 and FM Global standards
- some storage arrangements of rubber tires, roll paper, flammable liquids, aerosols, and automotive components

For more specific criteria, refer to Table B as well as the applicable design standard.

The Model ESFR-25 Pendent Sprinklers provide the system designer with hydraulic and sprinkler placement options not presently available to the traditional ESFR sprinklers having nominal K-factors of 14.0 and 16.8. In particular, the Model ESFR-25 Sprinkler has been designed to operate at substantially lower-end head pressures, as compared to ESFR Sprinklers having nominal K-factors of 14.0 and 16.8. This feature offers flexibility when sizing system piping, as well as possibly reducing or eliminating the need for a system fire pump.

Also, Model ESFR-25 Sprinklers permit use of a maximum deflector-to-ceiling distance of 18 in. (460 mm) versus 14 in. (356 mm). Additionally, a storage arrangement of 40 ft (12.2 m) with a ceiling height of 45 ft (13.7 m) does not require in-rack sprinklers as do other ESFR Sprinklers having nominal K-factors of 14.0 and 16.8.

The Model ESFR-25 Sprinklers are listed by Underwriters Laboratories (UL) for specific applications with a maximum storage height of 43 ft (13.1 m) with a maximum ceiling height of 48 ft (14.6 m) without the requirement for in-rack sprinklers. Refer to the Specific Application Listing (UL) for the design criteria.

Applications for the TYCO ESFR Sprinklers are expanding beyond currently recognized installation standards. For information on research fire tests, such as with flammable liquids and aerosols, that may be acceptable to an authority having jurisdiction, contact Technical Services.

IMPORTANT
Refer to Technical Data Sheet TFP2300 for warnings pertaining to regulatory and health information.

Always refer to Technical Data Sheet TFP700 for the “INSTALLER WARNING” that provides caution with respect to handling and installation of sprinkler systems and components. Improper handling and installation can permanently damage a sprinkler system or its components and cause the sprinkler to fail to operate in a fire situation or cause it to operate prematurely.

NOTICE

The Model ESFR-25 Sprinklers described herein must be installed and maintained in compliance with this document, as well as with the applicable standards of the National Fire Protection Association (NFPA), in addition to the standards of any authorities having jurisdiction, such as FM Global. Failure to do so may impair the performance of these devices.

The owner is responsible for maintaining their fire protection system and devices in proper operating condition. Contact the installing contractor or product manufacturer with any questions.

In all cases, the appropriate NFPA or FM Global installation standard, or other applicable standard, must be referenced to ensure applicability and to obtain complete installation guidelines. The general guidelines in this data sheet are not intended to provide complete installation criteria.

Sprinkler Identification Number (SIN)

Refer to Table A for sprinkler identification number.

Technical Data

Approvals
UL and C-UL Listed
VdS Approved
NYC Approved under MEA 356-01-E
LPCB Certified (Cert. Nos. 094b and 007l)
CE Certified (Certificate of Conformity 1725-CPR-F0010)

Finish
Natural Brass

Physical Characteristics
Frame .......................................... Brass
Deflector ...................................... Bronze
Compression Screw ........................ Stainless Steel
Hook ............................................. MONEL
Strut .............................................. MONEL
Link Assembly ............................... Solder, Nickel
Button .......................................... Brass
Sealing Assembly .......................... Beryllium Nickel w/ Teflon
Ejection Spring .............................. INCONEL

Additional Technical Data
Refer to Table A for additional technical data.
**Operation**

The fusible link assembly is comprised of two link halves that are joined together by a thin layer of solder. When the rated temperature is reached, the solder melts and the two link halves separate, activating the sprinkler and flowing water.

**Design Criteria**

The following general guidelines provided for the TYCO Model ESFR-25 Pendent Sprinklers can be used for a quick reference.

The National Fire Protection Association (NFPA) and FM Global (FM Approvals) provide installation standards that must be used to properly design an automatic sprinkler system utilizing Early Suppression, Fast Response (ESFR) Sprinklers. The guidelines provided by NFPA and FM Global may differ. Consequently, the appropriate standard must be used for a given installation.

General guidelines are not intended to provide complete installation criteria. In all cases, the appropriate NFPA or FM Global installation standard must be referenced to ensure applicability and to obtain complete installation guidelines. Refer to Table B for additional information.

In addition to this technical data sheet, the following data sheets describe other TYCO ESFR Sprinklers:

- **TFP313** Model ESFR-22 (TY8226) K=22.4 Pendent Sprinkler
- **TFP315** Model ESFR-17 (TY7226) K=16.8 Pendent Sprinkler
- **TFP316** Model ESFR-17 (TY7126) K=16.8 Upright Sprinkler
- **TFP317** Model ESFR-17 (TY7223) K=16.8 Pendent Sprinkler
- **TFP318** Model ESFR-1 (TY6226) K=14.0 Pendent Sprinkler
- **TFP319** Model ESFR-14 (TY6236) K=14.0 Pendent Sprinkler
- **TFP320** Model ESFR-17 (TY7229) K=16.8 Pendent Sprinkler

**Roof Construction**

Unobstructed or obstructed construction, such as smooth ceiling, bar joists, beam and girder. Where the depths of the solid structural members, as in beams and stem, exceed 12 in. (302 mm), install ESFR Sprinklers in each channel formed by the structural members.

**Ceiling Slope**

Maximum 2 in. rise for 12 in. run (16.7%)

**Maximum Coverage Area**

100 ft² (9.3 m²)

**Open Frame (i.e., no solid shelves), Single, Double, Multiple-Row, or Portable Rack Storage of Class I-IV and Group A or B Plastics**
- Refer to NFPA 13
- Refer to FM Global 2-0 and 8-9

**Solid Pile or Palletized Storage of Class I-IV and Group A or B Plastics**
- Refer to NFPA 13
- Refer to FM Global 2-0 and 8-9

**Idle Pallet Storage**
- Refer to NFPA 13
- Refer to FM Global 2-0, 8-9, and 8-24

**Rubber Tire Storage**
- Refer to NFPA 13
- Refer to FM Global 2-0 and 8-3

**Roll Paper Storage (Refer to the Standard)**
- Refer to NFPA 13
- Refer to FM Global 8-21

**Flammable/Ignitable Liquid Storage (Refer to the Standard)**
- Refer to NFPA 30
- Refer to FM Global 8-21

**Aerosol Storage (Refer to the Standard)**
- Refer to NFPA 30B
- Refer to FM Global 7-31

**Automotive Components in Portable Racks (Control mode only; refer to the Standard)**
- Refer to NFPA 13
- N/A

N/A – Not Applicable

In some cases, the installation standards permit a greater coverage area.

**Minimum Coverage Area**
- 64 ft² (5.8 m²) per NFPA 13 / FM Global 2-0

**Maximum Spacing**
- 12 ft (3.7 m) for building heights up to 30 ft (9.1 m)
- 10 ft (3.1 m) for building heights greater than 30 ft (9.1 m).

In some cases, installation standards permit a greater spacing.

**Minimum Spacing**
- 8 ft (2.4 m)

**Minimum Clearance to Commodity**
- 36 in. (914 mm)

**NFPA**
- Deflector-to-Ceiling Distance
  - 6 in. to 18 in. (152 mm to 457 mm)

**FM Global**
- Centerline of Thermal Sensing Element-to-Ceiling Distance
  - Refer to FM Global 2-0 for Storage Sprinklers.

TYCO Model ESFR-25 Pendant Sprinklers are listed by Underwriters Laboratories (UL) for Specific Applications with a ceiling height greater than 45 ft (13.7 m) up to and including 48 ft (14.6 m), and a storage arrangement up to and including 43 ft (13.1 m). Refer to Table C for guidelines for the TYCO Model ESFR-25 Pendant Sprinkler Specific Applications Listing (UL) Design Criteria. Refer to Table C for additional information.

**TABLE C**

**MODEL ESFR-25 PENDENT SPRINKLER**

**SPECIFIC APPLICATION LISTING (UL)**

**COMMODITY SELECTION AND DESIGN CRITERIA OVERVIEW**
**Care and Maintenance**

TYCO Model ESFR-25 Early Suppression, Fast Response 25.2K Pendent Sprinklers must be maintained and serviced in accordance with this section.

Before closing a fire protection system main control valve for maintenance work on the fire protection system that it controls, permission to shut down the affected fire protection system must be obtained from the proper authorities and notify all personnel who may be affected by this action.

Sprinklers which are found to be leaking or exhibiting visible signs of corrosion must be replaced.

Automatic sprinklers must never be painted, plated, coated, or otherwise altered after leaving the factory. Modified sprinklers must be replaced.

Sprinklers that have been exposed to corrosive products of combustion, but have not operated, should be replaced if they cannot be completely cleaned by wiping the sprinkler with a cloth or by brushing it with a soft bristle brush. Care must be exercised to avoid damage to the sprinklers before, during, and after installation. Sprinklers damaged by dropping, striking, wrench twist/slippage, or the like, must be replaced. Also, replace any sprinkler that has a cracked bulb or that has lost liquid from its bulb. Refer to Installation section for additional information.

The owner is responsible for the inspection, testing, and maintenance of their fire protection system and devices in compliance with this document, as well as with the applicable standards of the National Fire Protection Association, such as NFPA 25, in addition to the standards of any authorities having jurisdiction. Contact the installing contractor or product manufacturer with any questions.

**Limited Warranty**

For warranty terms and conditions, visit www.tyco-fire.com.

**Ordering Procedure**

Contact your local distributor for availability. When placing an order, indicate the full product name and part number (P/N).

**Sprinkler Assemblies**

Specify: Model ESFR-25 Early Suppression, Fast Response 25.2K Pendent Sprinklers (TY9226), (specify temperature rating), with Natural Brass finish, P/N (specify):

- 165°F (74°C) .................. 58-441-1-165
- 212°F (100°C) ................ 58-441-1-214

**Special Order Sprinkler Assemblies with ISO 7-1 Thread Connection**

Specify: Model ESFR-25, Early Suppression, Fast Response 25.2K Pendent Sprinklers (TY9226) with ISO 7-1 thread connection, (specify temperature rating), with Natural Brass finish, P/N (specify):

- 165°F (74°C) .................. 58-442-1-165
- 212°F (100°C) ................ 58-442-1-214

**Sprinkler Wrench**

Specify: W-Type 1 Sprinkler Wrench, P/N 56-872-1-025
