

**Customer Bulletin-7800FP Grooved Check & F517 Riser Check Valve**

February 6, 2004

Dear Friends and Valued Customers,

In an ongoing effort to consolidate product lines and offer the industry's premier line of fire protection products, Tyco Fire Products is replacing the Series 7800FP Grooved End Check Valves with the Model 590F Grooved End Valve. This will also affect the Series F517 Riser Check Valves since the body style is the same as the 7800FP. Due to supplier issues with the Series 7800FP Grooved End Check Valve, this change is effective immediately. The following is a list of the discontinued valve:

**Series 7800FP Grooved End Check Valve:**

Description	Part No.	Tech Data
2" Series 7800FP	59-516-1-010	Gem TD 313
2 1/2" Series 7800FP	59-516-1-011	Gem TD 313

As part of our consolidating process, it has been determined that the Model 590F is the industry's preferred grooved end check valve. Due to the lack of availability of raw material, we have had to make the switch to the Model 590F sooner than anticipated. We will be able to fill the orders in house for the 4" Series 7800FP Grooved End Check Valve only. Orders for all other sizes of the Series 7800FP will need to be converted to the Model 590F Check Valve. This change does not affect the European market as we are waiting for pending European approvals. Please contact your local inside sales representative for availability.

We apologize for any inconvenience this may cause. Thank you for your continued support and loyalty.

Sincerely,

*Jim Brunetti*
