**TYCO FIRE & BUILDING PRODUCTS PRODUCT EXPANSION – NEW ECOH DRY
SIDEWALL RELEASED**

May 7, 2007- Tyco Fire & Building Products is pleased to announce the release of the new Series DS-3 ELO-ECOH Dry Sprinkler; a truly ground-breaking solution in fire protection.

This 11.2 K-Factor, horizontal sidewall sprinkler is UL and C-UL listed for use in applications where the sprinkler or portions of the connecting pipe may be exposed to freezing temperatures. Ideal for warehouse loading docks, this sprinkler is also listed for slopes of 4/12 inches. This is the only extended coverage dry sidewall sprinkler designed for ordinary hazard applications that is available on the market.

Customers can now experience dramatic cost savings in their fire protection solutions by eliminating the need for dry and anti-freeze systems. They no longer have to purchase dry valves, compressors, air maintenance devices or accelerators, saving on both materials and installation costs.

This innovative sprinkler also doubles the “throw” of a standard sidewall sprinkler. Designed for extended coverage use in ordinary hazard occupancies (ECOH) per NFPA 13, a single DS-3 provides protection of areas up to 16 ft X 20 ft. In comparison standard sidewall sprinklers have only a 10 ft X 10 ft coverage area.

The D-3 ECOH Dry Sprinkler, available in either 155°F/68°C or 200°F/93°C temperature ratings, is available in natural brass, chrome plated and white polyester finishes and has a standard 1-inch NPT inlet thread connection. This product also has Tyco’s exclusive 10-year limited product warranty.

For more information on this new product offering from Tyco Fire & Building Products, please reference the technical data sheet TFP550 online at www.tyco-fire.com or contact your Tyco sales representative.

About Tyco Fire & Building Products

Tyco Fire & Building Products is a global manufacturer of water-based fire suppression system components and ancillary building construction products.
