**CUSTOMER BULLETIN:
Tyco BlazeMaster® CPVC Thread Sealants- NOW YOU CAN USE:
OATEY® Great White® Thread Paste**

Dear Friends and Valued Customers:

To date, the only methodology recommended by Tyco Fire and Building Products for use as a thread sealant with Tyco BlazeMaster® CPVC threaded adapters has been 2-3 wraps of Teflon® Tape (.0025 thickness, MIL-T-2773OA Standard).

Now, you have the option to use either the Teflon Tape or **Oatey® Great White® Thread Sealant**.

Note: it is not recommended to use the Teflon Tape and the Great White together. The reason for this is that the sealant can interfere with the overlapping of the Teflon Tape. Specifically, as the pieces are threaded together the Teflon Tape can “bunch-up” ahead of the mating threads resulting in potential leak pathways.

Sincerely,
Tyco Fire & Building Products Marketing

Oatey®

The first Pipe Joint Compound approved for FlowGuard Gold® and BlazeMaster® Systems!

GREAT WHITE® PIPE JOINT COMPOUND

Formulated with Teflon*, Great White® Pipe Joint Compound is designed for many piping applications including FlowGuard Gold® and BlazeMaster® CPVC Systems.

Lubricating and sealing threaded joints, Great White® is a non-hardening, non-separating and non-toxic pipe thread sealant. With its wide pressure and temperature ranges, Great White® is the versatile pipe thread sealant solution.

Lubricates and seals threaded joints

Withstands up to 3,000 PSI on gases from -50° to +400°F.

Effective up to 10,000 PSI on liquids from -50° to +500°F.
