June 5, 2006

To Our Valued Customers;

Due to the steep rise in market prices for base metals over the past several months, Tyco Fire & Building Products has experienced rapidly rising costs for zinc used in the manufacture of our Grinnell grooved product line.

As a result of this raw material cost escalation, effective Monday June 12, 2006, Tyco Fire & Building Products will increase its price on all Grinnell Fire Protection galvanized grooved product by an average of 12%. List prices for other Grinnell Fire Protection grooved products will remain the same. This increase will be effective for all orders received after the close of business on Friday, June 9.

The Grinnell Fire Protection Grooved Product revised price list will be available on our website at www.tyco-fire.com on Tuesday June 6.

We thank you for your continued support and look forward to being of service to you.

David Read
