

## JOHNSON CONTROLS ANNOUNCES THE EXPANDED UL LISTING OF LFP® ANTIFREEZE FOR LARGE VOLUME SYSTEMS

- *Industry's first UL Listed antifreeze now listed for system volumes up to 500 gallons*
- *Easy-to-use, cost-effective and safe solution for both retrofit and new construction*
- *Real-world applications include parking garages, garden centers, loading docks and other spaces where temperatures may fall below -10°F*

**MILWAUKEE – (September 17, 2020)** – Today, [Johnson Controls](https://www.johnsoncontrols.com), the global leader for smart and sustainable buildings, is announcing an enhanced listing for its LFP® Antifreeze. The industry's first UL Listed antifreeze is now listed for system volumes of up to 500 gallons.

LFP Antifreeze complements the full line of Tyco® fire suppression products. Those offerings, along with other Johnson Controls products and solutions, help make buildings more safe, secure and sustainable.

“With over 150 years of fire protection expertise, Johnson Controls continues to bring new innovations to market to enhance the customer experience,” said Bob Cordell, global product manager, Johnson Controls. “Whether you’re a contractor, AHJ or building owner, there’s a variety of benefits when using LFP Antifreeze. And with all systems requiring a UL Listing by 2022, this solution gives customers an easy, safe and cost-effective system that is compliant with NFPA standards.”

As the industry standard for freeze protection in wet pipe sprinkler systems since 2018, LFP Antifreeze continues to meet industry demands for improved fire protection in low-temperature environments.

LFP Antifreeze highlights include:

- Proven UL Listed product ideal for new construction or retrofit
- Compliant with NFPA 13 for light hazard occupancies of up to 500 gallons

- Compliant with NFPA 13R and 13D for residential systems
- Trusted protection for temperatures as low as -10 °F
- A patented formula with proven corrosion resistance
- Suitable for use with most common piping system materials, including CPVC
