

FOR IMMEDIATE RELEASE

Johnson Controls expands GRINNELL One-Bolt coupling portfolio with new smaller sizes

New 1.25- and 1.5-inch couplings allow for easier, quicker pipe installation

MILWAUKEE – (May 27, 2020) – [Johnson Controls](#) is expanding its GRINNELL G-Fire One-Bolt coupling product line by adding two new sizes: 1.25 and 1.5 inches. The new, smaller couplings allow contractors to perform quicker installations on smaller diameter piping and in tight spaces. As part of the One-Bolt family, both couplings feature the unique, single-bolt design that eliminates alternate tightening while resulting in more consistent installations and dependable product performance.

“First launched in 2018, our GRINNELL One-Bolt coupling product line now offers more choices for contractors working on a wide variety of projects, from storage facilities to standard commercial projects,” said Dave Nelligan, global product manager at Johnson Controls. “By adding these two new sizes, our customers can now have a complete range of One-Bolt couplings where speed matters most.”

The One-Bolt couplings allow fast and easy push-on installation thanks to a pre-lubricated gasket and pre-assembled design. The couplings can be used in both vertical and horizontal applications across wet, dry and freezer systems. They feature 360-degree contact for an exceptionally rigid joint and a grooved, rigid coupling design to make joining pipe faster and easier. A low-profile spine allows for installation in tighter spaces and a center-stop gasket ensures proper positioning on pipe. The couplings are UL/ULC Listed and FM Approved, with a pressure rating of up to 365 psi.

About Johnson Controls

At Johnson Controls, we transform the environments where people live, work, learn and play. From optimizing building performance to improving safety and enhancing comfort, we drive the outcomes that matter most. We deliver our promise in industries such as healthcare, education, data centers and manufacturing. With a global team of 105,000 experts in more than 150 countries and over 130 years of innovation, we are the power behind our customers' mission. Our leading portfolio of building technology and solutions includes some of the most trusted names in the industry, such as Tyco®, YORK®, Metasys®, Ruskin®, Titus®, Frick®, Penn®, Sabroe®, Simplex®, Ansul® and Grinnell®. For more information, visit www.johnsoncontrols.com or follow us @johnsoncontrols on Twitter.
