January 17, 2007

To Our Valued Customers:

Tyco Fire & Building Products cost structure continues to be negatively impacted by the volatility in raw material prices, and other cost increases beyond its reasonable control. As a result, effective March 13, 2007, Tyco Fire & Building Products will increase the current List Prices for many of the products manufactured and / or distributed by TF&BP.

- BlazeMaster CPVC Pipe and Fittings will be increased by 6%. This will include Solvent / Cement, CPVC Hangers, and associated CPVC Products.
- Sprinklers, Sprinkler Accessories, Valves, and related manufactured products will be subject to increases from 4.0% to 8.0%.
- Pricing for Grinnell® fire protection grooved couplings and fittings will increase by approximately 4 1/2%.
- Purchased products will be increased based upon current vendor pricing to us. Please consult the Price List available not later than February 13, 2007.

The price increase will be effective for orders placed on or after March 13, 2007. A copy of the new list price will be available on our website at www.tyco-fire.com by February 13, 2007. Copies of your net prices can be sent to you electronically to facilitate updating your files by your local sales representative.

Tyco Fire & Building Products is committed to providing the best and most complete line of fire protection products in the industry to you. We appreciate and thank you for your continued support, and we look forward to being of continued service to you.

Sincerely,

Jim Smyrl
