March 1, 2006

To Our Valued Customers:

Tyco Fire & Building Products has received price increases from our vendors, and we have absorbed the costs for over a month. As a result, Tyco Fire & Building Products is forced to increase prices for the affected items.

The increases have not been uniform and involve many of the product sections.

Section 19: **Rothenberger CPVC Tools** = 5%

Section 21: **General Air** = 5 ½ %

Section C: **Kennedy Valves** = 5% - 10%

Section F: **FPPI Drain & Split Rings** = 5% - 50%

Section H: **Tolco Hanger & Sway Bracing** = 5% (* 1 item increased 30%)

Section J: **LA-CO** = 5%, **Noble** = 5%, **FPPI Sealants** = 5%

Section K: **Acudor Access Panels** = 20%

The affected items are addressed individually, and we suggest that you check the price of items in question for changes. You will note that some items in the noted sections have not been increased.

The increases for the products will be effective for orders placed on or after March 13th, 2006.

Our amended specialty products pricing will be posted on the Tyco Fire & Building Products website at www.tyco-fire.com, and will be available immediately. The file can be downloaded from the site. Direct requests for pricing can be made by contacting your local Tyco Fire & Building Products representative or by calling 800-523-6512.

Tyco Fire & Building Products wishes to thank you for your support and patronage. Should you have any questions or comments, please do not hesitate to contact us. We look forward to being of continued service to you.

Sincerely,

Jim Brunetti
