TYCO UNVEILS NEW COMMERCIAL SPRINKLER FOR DESIGN-FOCUSED CLIENTS

Low-Profile, Aesthetically-Pleasing Sprinkler Targets Architects and Interior Designers with Customization

LANSDALE, Pa., USA (April 23, 2015) – Tyco Fire Protection Products, a division of Tyco (NYSE: TYC) and a global leader in fire suppression technologies, recently announced the launch of the RAVEN Studio sprinklers. The new solution offers a high level of aesthetic appeal, with custom color sprinklers available for factory order and an industry-first option to paint escutcheons in the field, even after installation.

Designed mainly for commercial applications such as hotels, casinos, offices, educational facilities, museums and other cultural properties, the 5.6K pendent and horizontal sidewall RAVEN Studio Sprinklers are UL and C-UL Listed, and are available in Standard Coverage for the protection of Light and Ordinary Hazard occupancies and Extended Coverage for Light Hazard applications, as defined by NFPA 13.

“By incorporating an unobtrusive, low-profile design with a paint-in-place escutcheon, the new Tyco RAVEN Studio sprinklers are uniquely discreet sprinklers in the industry today,” said Luke Connery, Global Product Manager at Tyco Fire Protection Products. “This can afford architects and interior designers an enhanced level of creative freedom not available with more traditional sprinkler options.”

The new sprinklers feature a revolutionary paint-in-place escutcheon, providing design-focused clients with a wide variety of custom colors to match the palette of nearly any project. The flush design is made aesthetically appealing by concealing the deflector and other operating parts behind the link assembly. The RAVEN Studio Sprinklers, with a heat sensitive solder type release element, are listed as quick response sprinklers.

For additional information regarding the RAVEN Studio sprinklers, please contact your local Tyco sales representative, or visit www.Tyco-Fire.com.
