**TYCO Launches New Version of SprinkCAD Suite including support  
for AutoCAD 2014 and BricsCAD V13**

**LANSDALE, PA, USA. (June 21, 2013)** – Tyco Fire Protection Products (TYCO), a global leader in fire suppression technologies, announces the immediate availability of the latest version of SprinkCAD Software for the Fire Protection Professional. This release further extends the SprinkCAD suite with new features and assembly modeling for the mechanical CAD market. This functionality will also be externalized through APIs to support the BricsCAD partner community in the development of new value-added solutions.

“With this latest version, CAD designers have a suite built to address their needs, whether it be simple 2D drafting to advanced 3D coordination” said Mike Mahomet, SprinkCAD Business Manager. “SprinkCAD creates a comprehensive environment that provides detailed hydraulic calculations, including our optional fluid delivery time program that accurately predicts water delivery to a remote area of a dry system, minimizing the need for a physical trip test.”

New functionality in this version of SprinkCAD includes:

- AutoCAD 2014 and BricsCAD v13 compatibility.
- Edit Valves-In-Plan command allows selection of one, multiple, or all valves of a given type to be replaced in one edit.
- Improved Design Area block with fields for “DA Size” and “DA Notes” which persist between calculation runs.
- A new set of double-line details with up-to-date hangers, valves, and sprinklers.
- A new set of templates for Metric users with a choice of Imperial or Metric paper sizes.

The new version of the SprinkCAD software is available immediately and can be downloaded from [www.SprinkCAD.com](http://www.SprinkCAD.com). Contact the SprinkCAD support team for additional information on the new release at (800) 495-5541 in the US or Canada or +31 53-428-4444 in Europe.

**About Tyco Fire Protection Products**

Tyco Fire Protection Products is a strategically aligned business unit of Tyco International with globally recognized products sold under leading brands, including ANSUL, CHEMGUARD, DBE, EZCare, FLAMEVision, GRINNELL, HYGOD, NEURUPPIN, PYRO-CHEM, RAPID RESPONSE, SIMPLEX, SKUM, SPRINKCAD, THORN SECURITY, VIGILANT, and ZETTLER. Tyco Fire Protection Products produces fire protection, detection, and mechanical building construction solutions for commercial, industrial, institutional, governmental, and residential customers. Heavy emphasis is placed on research and development, resulting in innovations and global approvals. Key products include manual fire-fighting equipment, detection/suppression systems, extinguishing agents, sprinkler systems, valves, piping products, and fittings.
