TYCO FIRE & BUILDING PRODUCTS Distributes THERMOCABLE™ LHD WIRE

January 5, 2007- Tyco Fire & Building Products is pleased to announce that it is now a master distributor of ThermoCable™ Linear Heat Detection Wire and accessories.

ThermoCable™ is a state-of-the-art Linear Heat Detection (LHD) wire, and is manufactured by Safe Fire Detection, Inc. Featuring extremely low resistance tri-metallic conductors and a UV resistant polymer outer covering, ThermoCable™ is ideal for a wide variety of fire protection applications and hazards where immediate heat detection is desired. This product meets NFPA 70 and 72 requirements and is UL, cUL listed and FM approved. Additional accessories available for ThermoCable™ wire include a full line of mounting and clamping equipment, connectors, junction boxes, special coatings, and a number of splicing accessories.

An advantage over other LHD wires, ThermoCable™ can be used with any listed detection and releasing panel, which means that installers and owners can choose from a variety of listed and/or approved panels. This eliminates the need to purchase expensive specialty or dedicated alarm panels. ThermoCable™ can also be installed in lengths of up to 10,000 linear feet per zone, which can be up to 7,500 feet longer than other LHD wires.

ThermoCable™ LHD Wire is ideally suited for use with the Tyco Fire & Building Products' releasing panel, PFC 4410-RC, and can be included in Quell™ Fire Sprinkler System packages, designed for cold storage and warehouse applications. All ThermoCable™ products and accessories can be ordered through Tyco Fire & Building Products' sales representatives or distribution centers. More information on ThermoCable™ LHD or any of Tyco Fire & Building Products' offerings can be found online at www.Tyco-Fire.com.

About Tyco Fire & Building Products

Tyco Fire & Building Products is a global manufacturer of water-based fire suppression system components and ancillary building construction products. It continually expands its capabilities through aggressive research and product development to provide its customers effective fire protection and construction solutions for residential, commercial, industrial and institutional buildings. Its products are sold worldwide under the following brand names: Acroba, Ancon, Central, Central SpraySafe, GEM, Grinnell, Lindapter, Quell, Rapid Response, SprinkCAD, Star, Unistrut and Wopf.
