***Customer Bulletin- Tyco BlazeMaster® CPVC Thread Sealants- Now You Can USE
FPPI PipeFit® Thread Sealing Paste with PTFE****

August 12, 2004

Dear Friends and Valued Customers:

Tyco Fire & Building Products is pleased to announce that FPPI PipeFit Thread Sealant with PTFE is now approved for use as a thread sealant with Tyco BlazeMaster® CPVC threaded adapters.

The expanded list of approved thread sealants now includes FPPI PipeFit Thread Sealant with PTFE; Oatey® Great White® Thread Paste; and Teflon® Tape.

Note: It is not recommended to use Teflon Tape together with recommended thread sealants. The sealant can interfere with the overlapping of the Teflon Tape and may cause the tape to “bunch-up” ahead of the mating threads and result in a potential leak pathway.

Sincerely,
Tyco Fire Products
